PROJECT SUMMARY

HUB57 Coworking needs a web platform to manage desk and meeting room reservations, control member subscriptions, and gain visibility into space occupancy. This process is currently handled manually, which leads to overbooked spaces and a lack of control over actual facility usage.

The proposed solution is a web system with a Spring Boot back-end that validates real-time availability, prevents booking overlaps, and centralizes membership, billing and occupancy information in an administrative dashboard.

BASE PROJECT QUOTE

Item	Price
Front-End development (booking interface and user dashboard)	€180,000
Back-End development (Spring Boot: booking and membership logic)	€280,000
Relational database (PostgreSQL, modeling and relationships)	€90,000
Admin dashboard and occupancy reports	€100,000
Initial deployment and testing	€50,000
Estimated total development cost	€700,000

The total is estimated at €700,000 given the scope of the system: a user-facing booking interface, availability-validation business logic, membership management, a relational database and an admin dashboard with occupancy reports.

ADDITIONAL SERVICES

Item	Price
Monthly hosting	€25,000 / month

Maintenance and updates	€40,000 – €80,000 / month
Training for administrative staff	€60,000
Basic SEO	€50,000

SERVICE CONDITIONS

- Payment terms: 50% upfront and 50% upon final delivery.
- Estimated delivery time: 6 to 8 weeks from approval of this proposal.
- Hosting and monthly maintenance are quoted separately and are not included in the development amount.
- 30-day warranty after delivery for bug fixes at no additional cost.
- Basic web accessibility (level A-AA) and responsive design included at no additional cost.
- Any additional functionality not described in this proposal will be quoted separately.
- All data and information managed by the platform remain the exclusive property of the client.
